

ABSTRACTMOBILE COMMUNICATION TERMINAL

5

The invention relates to a mobile communication terminal, advantageously a mobile phone. According to the invention, the communication terminal comprises input means and output means for outputting information to a user at least partially in a natural language. The communication terminal further comprises means for storing natural language data for a plurality of natural languages, means for selecting one of the natural languages to be used when outputting information through said output means, and means for editing natural language data.
